in the summer of 2020 china and india came near to war the nuclear armed adversaries both massed troops and equipment along their disputed border in eastern ladakh the two sides slugged it out with fists stones and clubs next to a fast flowing himalayan stream resulting in dozens of deaths and injuries many from hypothermia the entire 4 000 kilometre sino indian boundary is disputed in 1962 the two countries fought a short and vicious war that went badly for india and from which nehru never recovered the border called the line of actual control is not marked on any map agreed upon by the two sides it runs through the largely unpopulated and inhospitable high mountains of the himalayas from the 1990s as beijing and new delhi sought to resolve their seemingly intractable border dispute an elaborate system of agreements kept the situation akin to a kettle on a slow boil but the kettle is now boiling over the two rising asian giants both led by strongly nationalistic regimes neither of which wishes to blink first are seeking geopolitical and strategic advantage this timely book explains what is happening on the roof of the world and why that matters for us all

the unprecedented scale at which data is both produced and consumed today has generated a large demand for scalable data management solutions facilitating fast access from all over the world as one consequence a plethora of non relational distributed nosql database systems have risen in recent years and today s data management system landscape has thus become somewhat hard to overlook as another consequence complex polyglot designs and elaborate schemes for data distribution and delivery have become the norm for building applications that connect users and organizations across the globe but choosing the right combination of systems for a given use case has become increasingly difficult as well to help practitioners stay on top of that challenge this book presents a comprehensive overview and classification of the current system landscape in cloud data management as well as a survey of the state of the art approaches for efficient data distribution and delivery to end user devices the topics

covered thus range from nosql storage systems and polyglot architectures backend over distributed transactions and caching network to data access and rendering performance in the client end user by distinguishing popular data management systems by data model consistency guarantees and other dimensions of interest this book provides an abstract framework for reasoning about the overall design space and the individual positions claimed by each of the systems therein building on this classification this book further presents an application driven decision guidance tool that breaks the process of choosing a set of viable system candidates for a given application scenario down into a straightforward decision tree
