this book develops an original and comprehensive theory of political liberalism it defends bold new accounts of the nature of autonomy and individual liberty the content of distributive justice and the justification for the authority of the state the theory that emerges integrates contemporary progressive and pluralistic liberalism into a broadly aristotelian intellectual tradition the early chapters of the book challenge the traditional conservative idea of individual liberty the liberty to dispose of one s property as one wishes and replace it with a new one according to which liberty is of equal value to all persons regardless of economic position the middle chapters present an original theory of socio economic justice arguing that a society in which every citizen enjoys an equal share of liberty should be the distributive goal of the state it is argued that this goal is incompatible with the existence of large disparities in wealth and economic power and that contra conservative and libertarian economic arguments such disparities are harmful to the overall health of national and global economies the final chapters provide an original argument that the state has both a moral duty and a moral right to pursue this program of socio economic justice contra conservative and libertarian moral arguments and that only the measures necessary to implement this program lie within the morally justifiable limits on the state s authority though primarily a political work it spans most areas of practical philosophy including ethical social and legal theory and meta ethics moral psychology and action theory and though fundamentally a philosophical work it incorporates research from a number of fields including decision theory economics political science and jurisprudence primatology neuroscience and psychology and history anthropology sociology and ecology and is sure to be of interest to a wide range of scholars and students
