this readable introduction to particle physics and cosmology discusses the interaction of these two fundamental branches of physics and considers recent advances beyond the standard models eight chapters comprise a brief introduction to the gauge theories of the strong and the electroweak interactions the so called grand unified theories and general relativity ten more chapters address recent concepts such as composite fermions and bosons supersymmetry quantum gravity supergravity and strings theories and relate them to modern cosmology and experimental astronomy

the standard model offers no fundamental explanation for the origin of the fermion mass and mixing parameters except that they arise from yukawa couplings which are free parameters of the model the workshop addresses various theoretical phenomenological and experimental issues concerning quark and lepton masses and mixings which are central to solving the long standing fermion mass problem following the trend of the first tropical workshop aip cp 444 the focus is

again the presentation of the current status of the main accelerator and non accelerator neutrino mass experiments such as super kamiokande and sno the future experimental projects e g minos and some of the phenomenology related to them also included are reviews of the theoretical and phenomenological ideas related to the tests of the direct cp violating effects that are expected to occur in both the k and the b meson systems including discussions of future experimental projects

when nicolaus copernicus claimed that the earth was not stationary at the centre of the universe but circled the sun he brought about a total revolution in the sciences and consternation in the church copernicus theory demanded a new physics to explain motion and force a new theory of space and a completely new conception of the nature of our universe he also showed for the first time that a common sense view of things isn t necessarily correct and that mathematics can and does reveal the true nature of the material world as john henry reveals from his idea of a swiftly moving earth copernicus sowed the seed from which science has grown to be a dominant aspect of modern culture fundamental in shaping our understanding of the workings of the cosmos
